EDUCATION

United College of Engineering and Research, Prayagraj

2023 – 2027

B.Tech (Hons) – Artificial Intelligence & Machine Learning | CGPA: 8.42

St. Mary's Convent School, Prayagraj

2021 – 2023

Intermediate (12th): 83.2% | High School (10th): 94.6%

WORK EXPERIENCE

Infosys Springboard

Feb 2026 – Present

Remote | AI Intern

- Designed and implemented a Python-based convolutional network using EfficientNet-B0 to classify ~5,000 chest X-ray images, achieving 92% validation accuracy and demonstrating strong problem-solving skills.
- Managed version control with Git and GitHub for all code artifacts, ensuring reproducible experiments and facilitating seamless team collaboration.

IBM-PBEL

Jul 2025 – Aug 2025

AI Virtual Intern

- Executed end-to-end Python notebooks for NLP sentiment analysis on 10,000 text samples, constructing scikit-learn pipelines that reached an 85% F1 score and showcasing analytical problem-solving.
- Presented model findings to a virtual mentor panel, delivering concise technical summaries and receiving commendation for clear communication of complex AI concepts.
- Tracked code changes and collaborative work using Git/GitHub, maintaining a clean commit history that supported peer reviews and knowledge sharing.

Shadowfox

Aug 2025

Remote | Web Development Intern

- Developed responsive and user-friendly web applications using HTML, CSS, JavaScript, and React.
- Collaborated with the team to design and improve UI/UX features.
- Utilized Git for source control and conducted code reviews, strengthening team communication and ensuring consistent delivery standards.

Vault of Codes

Aug 2025

Remote | Web Development Intern

- Developed a website for clients and internal use.
- Gained exposure to project-based development and client requirements.

ACADEMIC PROJECTS

AI-Based Smart Traffic Management System (Ongoing)

- Developed an AI-powered traffic management system using real-time data to dynamically optimize signal timings and reduce congestion.
- Implemented predictive models to analyze traffic patterns and forecast peak congestion hours.
- Built and deployed a web-based interface for live traffic monitoring and route optimization on **Vercel**.

CliniScan — AI Chest X-Ray Analysis System

- Built multi-label disease classifier (EfficientNet-B0) and object detector (YOLOv8s) across 14 chest X-ray disease classes.
- Deployed full-stack FastAPI HTML web app on Hugging Face Spaces. [Github Link](#)

Network Security Model

- Built a Machine Learning pipeline for threat detection by training and evaluating multiple classifiers including Random Forest, Gradient Boosting, AdaBoost, Decision Tree, and Logistic Regression to identify malicious network activity.

- Integrated experiment tracking using MLflow with DagsHub.

Student Performance Score Predictor

- Built and deployed an end-to-end ML pipeline to predict student Math scores.
- Tech Stack: Python, Scikit-learn, Pandas, NumPy, Flask, CatBoost, HTML/CSS, Render. [Github Link](#)

Hand Tracked Snake Game

- Developed a classic Snake game controlled using the index finger tracked in real-time via webcam.
- Built using Python, OpenCV, pygame, and cvzone.

Sentiment Analysis of Product Reviews

- Built a Machine Learning model using Naive Bayes Algorithm to classify product reviews as positive or negative during IBM Internship.
- Applied NLP techniques with Python (Pandas, Scikit-learn, NLTK).

SKILLS

- Programming Languages: Python, C
- Fundamentals: Data Structures and Algorithms, DBMS, Operating System, OOPS
- Web Development & Frameworks: HTML, CSS, ReactJS, Bootstrap, FastAPI
- Database: MongoDB, MySQL
- AI & Data Science: Machine Learning, NLP, Data Analysis (Pandas, NumPy, Power BI, Tableau), n8n Agents
- Tools & Platforms: Git/GitHub, Netlify, Hugging Face
- Soft Skills: Problem-Solving, Time Management, Adaptability, Communication

CERTIFICATIONS & TRAININGS

- Figma Bootcamp – LetsUpgrade 
- Summer Training in Python for Data Science – UCER, Prayagraj 
- Data Science with R – LinkedIn Learning 
- Google Arcade Facilitator Program Cohort 2 – 2025 
- Deloitte – Data Analytics Job Simulation 
- Tata Job Simulation – GenAI Powered Data Analytics 
- Claude Code in Action – Anthropic 

ACHIEVEMENTS

Smart India Hackathon 2025 Finalist

- From 78000+ teams, Gained Top 5 position in my Problem Statement.

Finalist - Meta PyTorch OpenEnv Hackathon (Scaler x Meta)

- Advanced to on-campus Grand Finale (Top 1% among 52k+ participants).
